Jack Johnson in a Peck of Trouble Because of Switching His Citizenship — He May Have to Join the French Army.

EORGES CARPENTIER, the

great French boxer, has joined the French army and will be fighting with rifle and bayoet instead of his fists. Ledous, the French antam champion, is also in the army. It's said that Jack Johnhaving taken out his first papers and sworn allegiance to France. Is likely to be drafted into the army Johnson is just over the age at which french citizens are held for service during times of peace, but in war time any able-bodied man may be called out. Johnson can hardly claim that he isn't able-bodied. This switching citizenship gets some people into a peck of trouble.

WHENEVER Joe Jeanette hasn't anything else to do he "stops Black Bill." It's hardly kind

abit of taking on a real job about wice a month in the person of Jim

Johnson—if one can call Battling Jim a "person."

I see that the nimble press agents are sending out lots of "dope" on what Battling Jim and Joe Wolcott, the trainer, are saying about Wednesday night's fight with Jeanette. Battling Jim is copiously quoted to the effect that he "won" the inst Jeanette fight with a fair blow in the closusoh, which knocked Jeanette out. If the true that Battling's manager tried strenuously to make such a claim at the time, although every spectator on the west side of the ring saw the foul blow that put Jeanette Gewn, and knew that Referee Joh was flatly ignoring all rules of boxing by allowing Jeanette to go on after a five-minute rest instead of disqualifying Johnson for striking the foul blow.

Battling Jim is said to have said

Battling Jim is said to have said that he'll polish Joe off this trip. It's wallkely, but not impossible, that he'll do it, whether he ever said so or not. Jehnson swings his arms the way Wagner swings his bail bat—the result being a home clout if it lands.

MERICAN fighters in Europe are making a wild rush to get home again. Only a few get home again. Only a few weeks age the harvest field of the baser, old Europe has taken such a light grip on the spare change to day that you couldn't pry loose a franc plece with a crowbar. Carpentier and Smith, in Paris to-night, wouldn't draw enough to pay the unbers. France, England and other boxing countries across the sea have something more important than the biggest boxing match to watch just now. So note the overflowing patriotism when the boxing men reach been again. This little old country is prestly good after all.
